EXPERIENCE

Data Scientist (Internship) - Bazaarvoice, Austin, Texas, USA	May 18 – Aug. 18
- Auto Moderation tool – Developed a Deep Learning (CNN) Model (82% acc.) using Keras, AWS Sagemaker for auto moderation of images, saving on replacement with manual Moderation up to \$92-100k in a year. - Review Insights – Developed a script using NLTK, Flask-API running on AWS to get insights from thousands of reviews posted on client websites.	
Data Analyst - Abbott Power Plant, UIFS, Illinois, USA	June 17 – May 18
- Creating/automating dashboards from Data generated by 10,000 data points at the plant. - Estimating and analyzing the production cost as well as improving efficiency with predictive modelling. Also, calculating emissions with EPA norms.	
Business Intelligence Developer – Blazon Creations Ltd, Indore, MP, India	June 15 – Dec.16
- Improved operational efficiency of logistics by 7% of a major Retail company through Inventory Management and analysis of GIS Data. - A/B testing to decrease churn rate and Improved Web traffic of client's website by up to 20% through Web Analytics, SEO and Web Portal optimizations.	
Computational Biologist – Eminent Biosciences (EMBS), Indore, MP, India	Sept.14 – May 15
Statistical analysis of Micro Array, Next-Gen sequencing data using computational approach, Bioinformatics and open source tools.	
Graduate Research – Jawahar Lal Nehru University, New Delhi, India	Dec. 13 – Aug. 14
- X-Ray diffraction data preprocessed/analyzed using HKL2000 and XDS, collected at source (JNUCAR) and synchrotron (Indus-1,2 and RRCAT) for Drug Design, Protein structure prediction. - Structure determination by experimental Phasing using CCP4 and Phenix suite, visualization and refinement using Coot (Linux).	

EDUCATION

University of Illinois at Urbana-Champaign. Illinois, USA	Dec. 18
Master's (M.S.) in Information Management. (Teaching Assistant: CS598)	
VIT University. Vellore, TN, India.	Aug. 14
Master's (M.S.) in Bio-informatics and Biotechnology. (Teaching Assistant: BST504, BMG502)	
Christian Eminent College. Indore, MP, India	July 12
Post Graduate Diploma in Computer Applications	
Institute of Professional Studies (DAVV). Indore MP, India	Aug. 11
Bachelor's (B.S.) in Computer Science and Biotechnology.	

PROJECTS (RELEVANT ONLY)

- Programming Analytics/Predictive Modelling:** Built a Monte Carlo simulation for predicting the prices of Cryptocurrencies with evaluation for the next 2 years using pandas and Matplotlib.
- Data Visualization:** Developed data visualization for CU-MTD transportation system using Numpy, pandas, matplotlib and bqplot library in python. Created interactive modules by writing callback functions for the different components.
- IoT Project/Supply Chain Management:** Developed a GPS tracker device using raspberry pi-3 and U-Blox Neo-6M GPS from scratch. Used AWS for storing the data and python for implementation of geo-fencing module.
- Data Cleaning:** Used OpenRefine & Python to clean the NYPL dataset, created a relational model of the dataset using SQL on SQLite database. Generated prospective provenance information of the process involved using YesWorkflow and datalog, while working with a team of 4 members.

TECHNICAL SKILLS

Programming Languages: Python, Java Script, Scala Statistical Computing Tools: Pandas, Numpy, SAS and R Cloud computing: Amazon Web services (AWS), Google Cloud Platform (GCP) Machine learning: Scikit-learn (Python), TensorFlow, Keras and WEKA.	Analytical Tools and Libs: Tableau 9.0, Matplotlib, Bokeh and Pivot Charts. Query Languages: PostgreSQL, MySQL, PandaSQL. Big Data Analytics: Apache Spark (Pyspark) Web development: Django, CSS, HTML, Bootstrap Data Cleaning: Open-Refine (Google).
---	--

CERTIFICATIONS (RELEVANT ONLY)

- Computer Vision with OpenCV and Deep Learning.
- Django Full Stack Web Developer Bootcamp.
- Python for Financial Analysis and Algorithmic Trading.
- Python for Data Science and Machine Learning.
- SAS Programming and Statistics essential.
- TensorFlow for Deep Learning.
- GCP: Google Data Engineer and Google Cloud Architect.
- Scala and Spark for Big Data and Machine Learning.
- Spark and Scala Foundation.
- Stanford Online – Machine Learning.
- "Apache Drill, Essentials and Architecture" – MAPR academy.

*For Certification License, Research Publication and validation please see LinkedIn account.
